

Comprehensive. Affordable. Compliant.

Tesseract Secure is a turnkey, cloud-based cybersecurity and CMMC compliance solution built for small and mid-sized businesses in the Defense Industrial Base (DIB). Created by former Navy cyber veterans and Microsoft engineers, it's the fastest and most affordable way to reach and maintain CMMC Level 2 compliance - at a price and speed unmatched by traditional MSPs or DIY approaches.

Whether you're preparing to bid on your first DoD contract or need to meet DFARS 252.204-7019 requirements under a fast-approaching deadline, Tesseract Secure helps you get compliant, stay compliant, and focus on growing your business.

Why Customers Choose Tesseract Secure

Purpose-built for Compliance that Lasts

Tesseract Secure isn't just another security tool or MSP bundle. It's a full-featured, cloud-native, CMMC-aligned compliance solution that delivers value from day one - and every day after. Built entirely within Microsoft GCC-High, the program provides a dedicated, pre-configured enclave to safeguard Controlled Unclassified Information (CUI) while giving your team flexible access and minimal IT overhead. This ensures your CUI is never processed, stored, or transmitted outside of your boundary.

No on-prem hardware. No hybrid complexity. Just a focused, compliant environment that enables rapid deployment and easy scaling.

Complete Compliance, Out of the Box

Covers all 110 NIST 800-171 controls (CMMC Level 2) - including policies, documentation, cloud configuration, system hardening, and security monitoring..

Fixed Pricing, No Surprises

Starting at under \$1300 a user (including Microsoft licenses & Tesseract fees), with per-user pricing and no required minimums. Add-ons are available for additional functionality.

Fast, Predictable Deployment

Full setup in just 3 weeks, including GCC High tenant provisioning, identity configuration, and full security baselining.

Continuous Compliance Built In

Includes Microsoft Defender XDR, Sentinel SIEM, policy documentation, monitoring, and user education - all bundled.

Built for Businesses With or Without IT Staff

Designed to support internal IT, work alongside your MSP, or operate independently with Ardalyst's expert team.

What's Included? Everything You Actually Need

Don't Just Check a Box - Check Every Box

Tesseract Secure delivers a complete CMMC Level 2 cybersecurity program - not just a tool for sending CUI. With full coverage of all 110 NIST 800-171 controls, real-time monitoring, documentation, Microsoft licensing, and dedicated support, Tesseract Secure gives you everything you need to get and stay compliant.

Included with every Program:

- ✓ Full System Security Plan (SSP)
- ✓ Risk Assessment
- ✓ Inventory, Asset, and User Management
- ✓ Complete Security Architecture
- ✓ System Hardening
- ✓ Vulnerability Management
- ✓ Audit Log Management
- ✓ System Monitoring
- ✓ Threat & News Monitoring and Remediation
- ✓ Security Investigations and Incident Response*
- ✓ Annual or As-Needed Program Updates

Choose the Right User Type for Your Needs

Flexible for the Way You Work

Tesseract Secure offers flexible user options to match different work roles and security requirements:

Web User:

Lightweight, browser-only access with strict data controls (no downloads)

Full User:

User who needs to download with a physical endpoint + USB printing in a tightly restricted setup

Email User:

Browser-only experience limited to secure email via Outlook Web Access

Kiosk User:

Shared workstation users (multi-identity) in environments requiring secure, limited access

Cloud User:

Users who need to download files or work in a full virtual desktop experience

All user types are fully managed by Ardalyt and upgradeable at any time - with no tenant rework required.

Continuous Compliance

Compliance Doesn't End with a Pass

Getting compliant is hard enough, but staying compliant is where most programs fall apart. Tesseract Secure doesn't just help you pass an assessment - it keeps you continuously aligned with CMMC. We track and respond to the Six Sources of Change™ that impact your CMMC posture:

1. **New Threats:** Evolving risks from cyber attackers
2. **New Vulnerabilities:** New risks from system flaws
3. **Vendors Change:** New capabilities from Microsoft or other vendors
4. **Regulatory Change:** New laws or regulatory updates from DoD and others
5. **We Change:** We're always improving your program
6. **You Change:** Secure grows with you as you evolve your business

*Security investigations are included. Incident Response is an additional fee.

Why We're Different

Powered By Ardalyst

Ardalyst is a cybersecurity and digital transformation solution provider specializing in leveraging Microsoft's productivity and security solutions – among a few others. We built Tesseract Secure because we've been in your shoes. As defense contractors and cybersecurity experts, we saw too many companies being forced to choose between overpriced advisory projects and underpowered tools that left them exposed.

We rejected that model - and built the solution we wished we had:

- No bloated project plans or endless billable hours
- No software that only solves part of the problem but ignores 95% of CMMC
- No leaving customers to figure it out after the contract ends

Tesseract Secure is compliance done right - with a clear path to success, backed by real expertise.

// Tesseract got me critical access to GCC High when no one else could, seamlessly took over my NIST compliance efforts, and transformed a daunting, expensive process into something manageable and affordable. //

- Neil J.
President

Get Started with Tesseract Secure!

Get ready with Tesseract Secure and develop your comprehensive and compliant program design and plan for your business at no risk. If you like what you see, sign up for your Tesseract Secure Program and we'll work with you to make your plan a reality.

- Free CUI Flow & Enclave Scoping
- Overview of the Tesseract Managed Cybersecurity Program and your path to getting & staying compliant
- Exclusive deals on additional tools like Microsoft GCC & GCC-High

Get started today and schedule your free business risk assessment at www.tesseract.ardalyst.com.
